

USER MANUAL

Smart Agriculture App

Version: 1.0.0+1

Last Updated: May 2026

1. Introduction

Smart Agriculture is an intelligent mobile application designed to assist farmers and users in improving agricultural productivity. The app provides features such as crop disease detection and weather forecasting based on real-time data.

2. Purpose of the App

The main objectives of the Smart Agriculture App are:

- To detect crop diseases using image analysis
 - To provide real-time weather updates and forecasts
 - To support better farming time decisions through AI-based recommendations
-

3. System Requirements

To use the app smoothly, the following requirements are recommended:

- Android device (Android 7.0 or higher)
 - Active internet connection
 - storage permissions enabled
 - Location access enabled (for weather accuracy)
-

4. Installation Guide

1. Download the APK file
2. Open the installation file
3. Allow necessary permissions (Location, Storage, Internet)

4. Tap **Install**
 5. Once installed, open the application
-

5. App Features

5.1 Crop Disease Detection

- Select an image of a crop leaf
 - Upload the image within the app
 - The system analyzes the image using AI
 - Results show possible disease and suggested treatment
-

5.2 Weather Forecast

- Displays real-time weather updates
 - Shows temperature, humidity, and forecast conditions
 - Automatically uses your location for accurate results
-

5.3 Agricultural Recommendations

- Provides suggestions based on crop condition and weather
 - Helps users improve crop health and productivity
-

6. How to Use the App

Step 1: Open the App

Launch the Smart Agriculture app from your device.

Step 2: Grant Permissions

Allow required permissions:

- Location (for weather services)
- Storage (for image selection)

Step 3: Select a Feature

Choose from:

- Crop Disease Detection
- Weather Forecast

Step 4: Upload Image (if required)

Select an image from the gallery

Step 5: View Results

The app will display analysis results or weather information.

7. Permissions Used

The app may request the following permissions:

- **Internet Access:** For fetching weather and AI processing
 - **Location Access:** For local weather updates
 - **Storage Access:** For selecting crop images
-

8. Troubleshooting

App not loading data

- Check your internet connection

Location not working

- Enable GPS and allow location permission

Image upload issue

- Ensure storage permission is granted
-

9. Data Privacy

All user data is processed securely. Images and location data are used only for analysis and are not shared with third parties.

10. Support
